

# USER MANUAL

---

## ATTENTION:

The game works only on Microsoft Windows 7 or higher. In addition, it requires the Microsoft .NET Framework installed and about 120MB of free RAM.

- The interface has been adapted to navigate using arrow keys.
- The action is confirmed by pressing the Enter key.
- Exit from screens/windows is done by pressing the appropriate button in the interface or the Esc key.
- In the Rope Jumping mini game, the space bar to jump is additionally used.
- The F10 key is used to take screenshots of  $225 \times 160$  pixels, and F12 to take screenshots of the size  $(225 * \text{font width}) \times (160 * \text{font height} / 2)$  pixels. Screenshots are saved in the screenshots directory in the game directory.

## Description of the in-game menu buttons:
